**COOKPAK<sup>®</sup> AIR-ACTIVATED RATION HEATER TECHNOLOGY FEATURED IN  
POSTER SESSION AT 26<sup>th</sup> ARMY SCIENCE CONFERENCE**

COLLEGE STATION, TEXAS, December 1, 2008 – RBC Technologies announced today that its CookPak<sup>®</sup> Air-Activated Ration Heater (AARH) technology is featured in a poster session at the 26<sup>th</sup> Army Science Conference, December 1<sup>st</sup> - 4<sup>th</sup>, being held in Orlando, Fl. The poster, created by Mr. Paul DellaRocca, contracting officer, with assistance from RBC, describes the AARH and provides information on its design and use.

“Including this poster in the conference demonstrates the Army’s desire to pursue this technology as a possible replacement for the current flameless ration heater”, said Dr. Lawrence Tinker, president. RBC plans to continue the development of this technology for both the Army and other commercial uses. To review the poster please visit RBC’s website at [www.rbctx.com](http://www.rbctx.com).

RBC Technologies, a privately held research and development company, is focused on development of technologies related to chemical energy systems such as batteries and chemical based heaters. For more information about RBC and its technologies, including licensing opportunities, contact RBC Technologies at 979-260-1120, or on the web at [www.rbctx.com](http://www.rbctx.com).

Note: This release contains statements which, to the extent that they are not recitations of historical fact, may constitute "forward looking statements" within the meaning of applicable federal securities laws and are based on current expectations and assumptions. These expectations and assumptions are subject to a number of risks and uncertainties, which could cause actual results to differ materially from those anticipated, which include but are not limited to the following: ability of RBC Technologies to achieve its development goals, implement its strategy, license or commercialize its technologies, or to protect its proprietary rights to its technologies, the development of competing technologies, demand for and acceptance of RBC Technologies’ products in the marketplace, ability of RBC Technologies to raise additional funds and other factors affecting RBC Technologies’ business that are beyond their control. All forward looking statements contained in this summary are intended to be subject to the safe harbor protection provided by applicable federal securities laws.
