RBC TECHNOLOGIES AWARDED SBIR PHASE II ENHANCEMENT CONTRACT

Program to Develop Pilot Line Capability for Air-Activated Ration Heaters Utilizing CookPak[®] Self-Heating Technology

BRYAN, TEXAS, January 5, 2010 – RBC Technologies announced today that it has been awarded a SBIR Phase II Enhancement Contract as a follow-on to its previous Phase II award. The \$730,000, eighteen month program is intended to support transition of the AARH technology from prototype to pilot scale commercialization.

“We are pleased to have the continuing support of the Army SBIR Program Office in developing this technology”, said Lawrence Tinker, president. “The timing of the award fits well with the transition to our new location in the Science Park at Research Valley. Those facilities are well suited to the development activities required to complete this program.”

The company also anticipates that additional funding from other Army programs will provide further support for the completion of the commercialization effort.

RBC Technologies is a privately owned technology development company engaged in the development of technologies related to portable energy systems. RBC has developed a portfolio of technologies related to batteries and chemical based heater systems. For more information about RBC and its technologies, including licensing opportunities, contact RBC Technologies at 979-260-1120, or on the web at www.rbctx.com.

Note: This release contains statements which, to the extent that they are not recitations of historical fact, may constitute "forward looking statements" within the meaning of applicable federal securities laws and are based on current expectations and assumptions. These expectations and assumptions are subject to a number of risks and uncertainties, which could cause actual results to differ materially from those anticipated, which include but are not limited to the following: ability of RBC Technologies to achieve its development goals, implement its strategy, license or commercialize its technologies, or to protect its proprietary rights to its technologies, the development of competing technologies, demand for and acceptance of RBC Technologies' products in the marketplace, ability of RBC Technologies to raise additional funds and other factors affecting RBC Technologies' business that are beyond their control. All forward looking statements contained in this summary are intended to be subject to the safe harbor protection provided by applicable federal securities laws.
